- 4. Fold trim assembly mounting springs inward and insert trim assembly into ceiling cutout with the angle of the heat sink opposite wall to be illuminated. Be sure once installed, trim assembly is flush and secure (See **FIG. 4**).
- 5. Raise trim up to the trim assembly until the trim is flush with ceiling surface. Be sure trim springs go into appropriate slots in the trim assembly (See **FIG.5 & 6**).

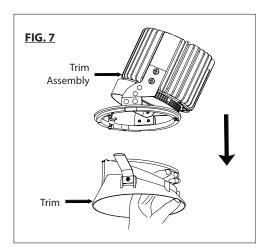

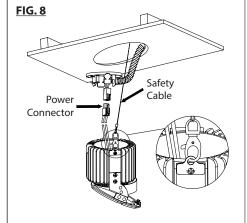

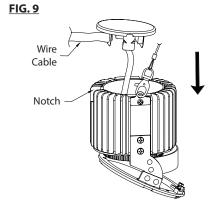

### **Trimless INSTALLATION (R4RWL)**

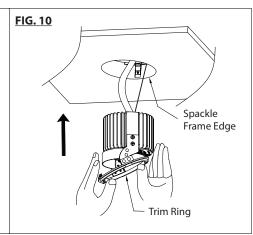

- 1. Remove trim from trim assembly (See **FIG.7**).
- 2. Raise trim assembly to ceiling cutout and connect power connector and safety cable (See **FIG.8**).
- 3. Install connector cap onto top of trim assembly, careful not to pinch power wiring.

  Make sure the cap wire cable aligns with the notch on the top of heat sink (See **FIG.9**).
- After power and safety chain connections, insert trim assembly into spackle frame.
   To make the installation easier, make sure the trim ring is parallel to the spackle frame edge inside opening (See FIG.10).
